Profile

Passionate engineer who loves to build **user first** and **highly efficiency** solutions. 2+ years of experience in building **web**-based applications as a **full stack developer** following **Agile** principles.

Employment History

Software Consultant at Thoughtworks Technologies Pvt Ltd, Bangalore.

MARCH 2020 — PRESENT

Internships

STEP Intern at Thoughtworks India, Bangalore

MAY 2018 — FEBRUARY 2020

- During internship, I have learnt software fundamentals and teamwork and also improved as a person with the help of experienced mentors.

Skills

Languages: JavaScript, Java, Ruby, HTML & CSS

Frameworks: NodeJs, React, Spring boot, Ruby on Rails, Angular, React Native

Cloud Technologies: AWS, GCP, Kubernetes, Docker

Databases: PostgresDB, MongoDB

Testing libraries: RTL & Enzyme (React testing), Jest, Junit

Tools: Git

Projects

Client: GoldmanSachs

MARCH 2021 — PRESENT

- Worked on a dashboard to manage **AWS resources** in 100+ accounts and multiple regions with proper authorization, traceability and resilience.
- Took **complete responsibility for UX/UI** and built React web application from scratch using libraries like **Redux**, **Styled components**. Followed TDD to write tests for 90%+ of the code using **React testing library**
- Actively collected feedback from users and team to improve **usability**
- Worked on RESTful Spring boot web service to invoke AWS APIs and store requests and responses in **PostgresDB**
- Helped new Joiners **onboard** to the team and getting to pace. Also helped other teams move 10000+ SSM documents from existing GitLab based invocations to new dashboard.
- Moved to Analytics team to build new UI components and improve performance and UX of existing components.

Client: GoJek

MAY 2019 — DECEMBER 2021

- Worked on a system to collect **employee feedbacks** and reviews to calibrate rating and hikes.
- Rewrote previous **NodeJs** back-end using **Ruby on Rails** and migrated from **MongoDB** to **PostgresDB** for cleaner and structured data storage and stable product.
- Worked on all layers of the product development like splitting stories from business requirements, building React UI, Backend and setting up application in **GCP** Kubernetes.

- **Travelled to Indonesia** to discuss about new requirements with product owners and other PM's and supported users with queries.
